

Distributor for Military, Space and HighRel Applications

Avionic / Military DACH

(Germany, Austria, Switzerland)

Avionic data bus products ARINC429, MIL-STD-1553, ARINC717, ARINC825 (CAN), RS422 / 485, Discrete to Digital, Switches

Biggest Selection of qualified Transistors
JAN / JANTX / JANTXV / JANS Levels available

Oscillators
OCXO, MCXO, TCXO, VCXO, XO, SAW
Class B+ Parts (EAR99)

Fuses and Ferrite Chip Beads for noise, EMI and RFI suppression, both are EAR99
AEM also offers Tin Whisker mitigation

DC-DC Converter and EMI Filters Hybrid technology for small size, light weight, maximum reliability. No derating necessary.

Diodes, MosFets, and Transistors
Hi-Rel discrete, modules, hybrids
MIL-PRF-19500 equivalent screening

Diodes for medical, aerospace, industrial and commercial applications in all state of the art packages

Chips, Die and Memory Obsolescence Management for Memory (Retail+)

Optical Receiver und Transmitter
up to 12,5GBps / 4xRx and 4Tx in one Part

High reliability, military, aerospace
Optocouplers

ASICs and FPGA Conversions also available with DO-254 and SEE Capability

Test cards for Avionic ARINC429 / MIL-STD-1553, protocol converter/recorder
