Other HighVoltage Parts on Protec GmbH Linecard:

- Ceramic Capacitors up to 20KV
- High Voltage Transformers
- HV SIC PIN Diodes
- Silicon Carbide Diodes, FETs, IGBTs
- Transistors
- Low Cost HighVoltage Diodes

In short about Voltage Multipliers, Inc.

VMI manufactures a variety of discrete high voltage diodes ranging from 1kV to 16kV Vrwm, and 3000ns to 30ns Trr. They also manufacture a 10kV opto-diode, and opto-couplers ranging from 2500V to 25kV.

VMI designs and manufactures diode assemblies, including voltage multipliers and high voltage stacks. Product lines include miniature hybrid multipliers used in image intensification apps, to custom, three phase bridges useful in TWT system.

Custom voltage multiplier designs include Cockcroft-Walton series half-wave style, parallel multipliers, full-wave multipliers at DC output voltages up to 120kV.

VMI offers standard product lines of rectifiers up to 45kV, single-phase bridges up to 20kV/leg, and custom electrical specifications and custom packaging.

New Promotion Videos are being released

Voltage Multipliers, Inc. videos, "We Are VMI", are available for your review on YouTube.

There are four videos available, please click on below pictures:

The full length VMI video includes Daniel Deschene's demo of opto-couplers and Alex Jiang's demo of the new ViPS-40.

Short VMI video without the product videos.

Daniel Deschenes, Optocoupler video (product demo).

Alex Jiang, ViPS- 40 video (product demo).
